

Personal Safety Applications

Purpose: Find applications we can build off of or use components from

- VithU App
 - Push power button twice to send alert
 - Not open source
- Circle of 6
 - <https://github.com/guardianproject/OpenCircle>
 - Uses **java**, **android com** library
- Life360
 - <https://github.com/life360>

Using React-Native

- <https://github.com/pranjal9599/safety-app>
- <https://github.com/samassango/pulego-react-native-app>

Starter Kits

<https://github.com/mcnamee/react-native-starter-kit>

- Starter kit - Could build off of or use components and reference
- <https://react-boilerplate.mcnam.ee>

<https://github.com/blazing-edge-labs/react-native-skeleton>

- A skeleton used by Blazing Edge Labs (they don't clone it, just reference)

<https://github.com/JackOddy/React-Native-Skeleton>

[https://startreact.com/themes/native-](https://startreact.com/themes/native-starter/?utm_source=nativebase&utm_medium=showcase+section&utm_campaign=nativebase)

[starter/?utm_source=nativebase&utm_medium=showcase+section&utm_campaign=nativebase](https://startreact.com/themes/native-starter/?utm_source=nativebase&utm_medium=showcase+section&utm_campaign=nativebase)

Component Reference

<https://github.com/geektimecoil/react-native-onesignal>

- Push Notification library for react native:

Geolocation

<https://facebook.github.io/react-native/docs/geolocation>

- built in library

Navigation

<https://github.com/react-navigation/react-navigation>

- <https://reactnavigation.org/docs/en/pitch.html>
- Intentionally has lots of customizability

<https://github.com/wix/react-native-navigation>

Might Be Good For Later Reference

<https://blog.bitsrc.io/11-react-native-component-libraries-you-should-know-in-2018-71d2a8e33312>

.idea

- OOTW README should have screenshots of app
 - Or record screen of demo (I (Serena) have Mojave and have this capability)
